Generator Electrical Installations

Part No.

Product Description

At APS, we provide a full Generator electrical installation service of the highest standard. We will take care of all your Generator installation requirements from initial design, all the way through to final electrical testing. All our work is completed by experienced, qualified electricians in full compliance with statutory regulations. We aim to provide a professional Generator installation service at a cost effective price, regardless of your project size.

Our Electrical Services Portfolio is Extensive:

- Electrical design
- Installation
- Electrical Testing
- Electrical Mapping
- Completion Certificates
- Full schematics and schedules

Occasionally, clients choose to carry out their own electrical work. In such circumstances we can supply a full support package to assist with this process and ensure a smooth installation is completed on time.
