Eaton 5PX Gen2 (1-3kVA) UPS

Part No. 5PXGEN2

Product Description

The Eaton 5PX Gen2 UPS is a newer range (1kVA, 1.5kVA, 2.2kVA, and 3kVA) providing Enterprise Networks and Edge IT equipment with the ultimate line-interactive power protection to maximise IT space and Service Continuity. The range can also remotely monitor, integrate with IT architecture and remotely deploy or maintain large installed base of UPSs.

Ease of Operation

The innovative graphical LCD display makes configuration of the 5PX Gen2 easy and intuitive. The UPS offers an easy start-up configuration wizard to simplify your UPS setup process. Remote management and firmware upgrades are available with the optional Eaton Gigabit network management card. Advanced battery management and hot-swappable battery enables ease of maintenance and flexibility.

Efficiency

The 5PX Gen2 delivers 11% more power to connected servers than other UPS thanks to its unity power factor capability. It is Energy Star 2.0 certified for maximum efficiency across the full operating range. Energy is metered for each individual outlet group and is visible directly on the display and through Eaton's Intelligent Power Manager.

Secure and Resilient

Prioritise connected devices for maximum uptime of essential services. Easily manage power switching and disaster recovery with load segment control. Advanced virtualisation capabilities make the Eaton 5PX Gen2 perfect for Enterprise and Edge IT applications. Netpack models further protect your content with dual cybersecurity certifications (UL 2900-1 & IEC 62443-4-2)

and offer connection to Eaton's Cyber Secured Monitoring cloud.

Features

- Increased standard runtime by at least 25% on 1.5 and 2 kVA models compared to the earlier 5PX UPS
- Enhanced surge protection
- Enhanced power density: power factor 1 (W=VA) performance, providing 11% more power in the same rack space as 5PX Gen1
- Energy Star 2.0 certified; best-in-class efficiency performance
- Stay connected securely & reduce risk of intrusion: with the optional Gigabit Network Card (NETWORK-M2), which is the first UPS connectivity device to meet both UL and IEC cybersecurity standards

Specification

Power Rating	<i>1000 - 3000 VA</i>
Power Rating	<i>1000 - 3000 W</i>
Input	<i>C1 - C20</i>
Output	<i>(8) C13 to (8) C13, (2) C19</i>
Form Factor	<i>Rack/Tower</i>
