Eaton 9PX Rack/Tower (1-22kVA) UPS

Part No. 9PX

Product Description

The Eaton 9PX UPS range (1kVA to 22kVA) provides energy-efficient power protection for small to medium Datacentres, IT Centres and Infrastructure. The range was designed to deliver double conversion protection with 40% less energy usage making it a preferable range in the current market. The 9PX is the perfect UPS for IT and Facility managers that are concerned about the ever increasing energy cost and are looking for next generation power protection solutions for continuity of business operations.

Considerations for the lowest lifetime cost of a UPS

Hear from Eaton as we share our expertise to inform you of how you can lower your Total Cost of Ownership (TCO) and maximise availability of your UPS.

More power

Eaton 9PX (1-3kVA) is the first UPS in its class to provide Unity power factor (VA=W). It delivers 11% more power than any other UPS as well as powering more servers with equivalent VA ratings and lower power factors.

Energy Efficient

Energy Star qualified, the Eaton 9PX provides the highest efficiency level to reduce energy and cooling costs. 9PX can meter energy consumption right down to the managed outlet groups. kWh values can be monitored using the LCD or Eaton's Intelligent Power Software.

Virtualisation-ready

With an optional network card and Eaton's Intelligent Power® Software Suite

compatible with all major OS 9PX seamlessly integrates with leading virtualisation environments and cloud orchestrations tools.

Features

- Now available in lithium-ion versions
- Lowest lifetime cost of a UPS
- More power - (1-3kVA) 11% more than any other UPS of its class
- Energy efficient
- Pay as you grow model
