UPS

Riello Sentinel Dual UPS

Introducing the Riello Sentinel Dual UPS, the pinnacle of high-density, online double-conversion power protection. Engineered for mission-critical applications, the Sentinel Dual delivers unwavering reliability and superior performance, safeguarding your servers, storage and essential equipment in even the most demanding environments.

- Unmatched Power Density & Efficiency
- Absolute Protection for Critical Loads
- Advanced Monitoring & Scalable Runtime

Features

- Tower or Rackmount UPS: SENTINEL DUAL can be installed as a tower or 19" rackmount UPS, with a front mimic panel that can be turned through 90° to suit the installation.
- Noise-Free Operation (<40dBA): the UPS can be installed in any environment thanks to its PWM digitally-controlled high-frequency inverter.
- High-Temperature Operation: UPS components are sized for high-temperature operation up to 40°C and are not therefore stressed during normal operational environments.
- EnergyShare: Premium Dual output sockets can be programmed to disconnect less critical loads when the mains power fails.
- Online Connectivity
- Tower Configuration

Specifications

Manufacturer	Riello
Connectivity	Online
Configuration	Tower or Rack
Input Phase	Single
Output Phase	Single
